NEW PLUGIN RELEASE: SWEEPPRESS LITE/PRO

An easy to use plugin for WordPress database cleanup and optimization

Niš, Serbia, March 3, 2022. Dev4Press today announced the release of a new plugin for WordPress: SweepPress, in both Pro and Lite editions. SweepPress is a full-featured solution for clean up of WordPress website database, removal of unused or obsolete data, and optimization of database tables. Removing old and unused data from the database is an essential step in optimizing database performance. The plugin provides **27 Sweepers** that target different types of clean-up operations (for posts, comments, users, terms, options) with support for WordPress Multisite.

The screenshot displays the main dashboard of the SweepPress plugin. On the left is a sidebar with navigation buttons: Sweep, Jobs, Settings, Tools, and About. The main content area is divided into two sections. The top section, 'Plugin Status', shows that everything is in order, with 27 sweepers and 1 registered job. The bottom section, 'Auto Sweep', provides instructions on how to run automatic database cleanup and includes a summary of 3 sweepers, 4 tasks, 39960 records, and 12.5 MB of data. A prominent 'AUTO SWEEP' button and a 'Switch to Quick Sweep Mode' button are visible.

Plugin Status	Value
Everything appears to be in order.	✓ OK
Sweeper support modules status	WP CLI, REST API
Number of included Sweepers	27
Number of registered Sweeper Jobs	1

Auto Sweep Summary	Value
Sweepers	3
Tasks	4
Records	39960
Size	12.5 MB

Main plugin dashboard with Auto and Quick Sweep.

SweepPress can add commands into WP-CLI allowing to run cleanup operations from the command line, and it can add endpoints into WP REST API allowing to run cleanup operations through the REST API for authorized user accounts. In both cases, you have commands and endpoints to list available sweepers and estimated removal data.

SweepPress Pro includes additional features. From the Jobs panel, you can add Sweeper Jobs, and each job can have a predefined list of sweepers to run. Job un can be scheduled to run at specified time one, or as a recurring job on a schedule. And, Pro version also can track and list WordPress CRON system to identify Cron Jobs sources, run each Job at any time or remove Jobs. The plugin can identify job sources and you can remove jobs belonging to unused plugins.

For more information about SweepPress, a list of features, and related articles, please visit the plugin home page: <https://sweep.press/> or plugins.dev4press.com/sweeppress and the page in WordPress.org plugins repository to get the Lite version of the plugin: wordpress.org/plugins/sweeppress.
