UPDATED PLUGIN RELEASE: SWEEPPRESS PRO 5.0 / LITE 3.0

Next-level cleanup with Options, Sitemeta, and Metadata management.

Niš, Serbia, April 22, 2024. Dev4Press announced the release of SweepPress Pro 5.0 and SweepPress Lite 3.0, major releases bringing next-level cleanup features for WordPress-powered websites. SweepPress can now manage WordPress Options, Sitemeta, and all WordPress Metadata tables, identify options and metadata sources, and allow users to remove obsolete data.

New Options Management panel in Pro and Lite editions

SweepPress's development goal was always to allow website owners to clean their websites as much as possible and give them the ability to go into options and metadata tables to preview and remove records from 7 more WordPress tables.

The lite version of SweepPress includes the Options panel, and the Pro version can also manage Sitemeta (in WordPress Multisite), Postmeta, Termmeta, Usermeta, Commentmeta, and Blogmeta database tables. The plugin features several methods to identify and track the usage of options and metadata to give the website owner more precise information about each record in all supported tables. The plugin includes a full list of all WordPress Core options and meta keys.

Various other aspects of the SweepPress plugin have been improved, starting with the updated plugin Dashboard panel, improved Statistics and Database panels, more tools added for cached data purge, integration with the DebugPress plugin to preview data, and much more.

For more information about SweepPress Pro, its features, useful links, knowledge base, and more, please visit the plugin landing page: sweep.press. The official blog announcement for this latest release is available here: www.dev4press.com/blog/plugins/2024/sweep-press-pro-5-0-lite-3-0-next-level.
